SUMMARY

Informatics Engineering graduate from Universitas Katolik Santo Thomas with hands-on experience in backend operations, cloud infrastructure, and full-stack development. Proficient in Python, JavaScript, and SQL, with a proven track record of developing system integrations and managing Alibaba Cloud services. Skilled in log monitoring and automated workflows to ensure operational stability, eager to contribute and build scalable solutions.

EDUCATION

University of Katolik Santo Thomas — **Medan, Indonesia**
Bachelor of Informatics Technology (GPA 3.39/4.00) — *2019 – 2024*

EXPERIENCE

BFI Finance Indonesia — **Tangerang Selatan, Indonesia**
Data Analytics Operation — *September 2025 – December 2025*

- Managed and operated end-to-end backend workflows using Alibaba Cloud DataWorks, including system orchestration, scheduling, and dependency management.
- Developed and optimized ETL/ELT processes to ingest data from REST APIs, RDS (MySQL/PostgreSQL), and system log files into cloud ecosystems (MaxCompute and OSS).
- Conducted daily monitoring and log analysis to ensure system stability, troubleshoot execution failures, and maintain data integrity in production environments.
- Managed Alibaba Cloud OSS data lake structures, implementin g file versioning and standardized formats (CSV, JSON, Parquet) for scalable system architectures.

Nusantara Enterprise — **Medan, Indonesia**
IT Support — *September 2023 – October 2023*

- Set up and maintained over 100 units of computer hardware and networks for the SSCASN national examination.
- Performed regular backups of registration data, test results, and server systems.
- Monitored real-time system performance and resolved technical issues to ensure smooth exam operations.

SKILLS

Languages: Python, SQL, JavaScript, Kotlin.
Backend & Operations: Log Analysis & Monitoring, System Integration, ETL/ELT Processes.
Cloud Platform: Alibaba Cloud (DataWorks, MaxCompute, OSS), Vercel.
Databases: MySQL, PostgreSQL, SQLite.
Tools: Git, GitHub.

PROJECTS

Web Portofolio — *December 2025*

- Developed a responsive personal portfolio website using TypeScript and React, emphasizing clean code and efficient component architecture.
- Implemented maintainable design patterns using ReactBits for consistent UI across multiple views.
- Orchestrated deployment pipelines via Vercel, optimizing build workflows for fast and reliable performance.
